

DIGIREAL ASSETS Whitepaper Draft(Expanded Version)

Executive Summary

DIGIREAL ASSETS is a Hong Kong-based blockchain startup dedicated to transforming the hotel industry through Real World Assets(RWA)tokenization.By leveraging blockchain technology,we fractionalize hotel properties,room inventories,and revenue streams into digital tokens,enabling low-threshold investments starting from as little as \$1,passive yields of 6-10%Annual Percentage Yield (APY)backed by verifiable real rental income,and decentralized autonomous organization(DAO)governance for enhanced community participation and transparency.Positioned in Hong Kong,we capitalize on the city's LEAP framework (Legal clarity,Expansion of tokenized products,Advanced use cases,Policy support),introduced on June 26,2025,which aims to create a unified regulatory regime for digital assets and unlock a \$24 billion RWA tokenization opportunity in the region.Our platform targets the Asia Pacific hotel market,which boasts a robust pipeline of 957,000 rooms under contract,with a 4.2%year-over-year growth,and Revenue Per Available Room (RevPAR)projected to increase by 3.0%in 2025,primarily driven by Average Daily Rate (ADR).Globally,the RWA market has reached approximately \$25 billion in Q22025, marking a 260%surge from \$8.6 billion at the year's start,and is projected to grow to \$30 trillion by 2030,highlighting the immense feasibility and reliability of tokenization in bridging traditional assets with blockchain.Our Minimum Viable Product(MVP)will launch with essential tokenization features,fully compliant with the Securities and Futures Commission (SFC)'s A-S-P-I-Re roadmap released on February 19,2025,and the Digital Asset Policy 2.0,ensuring high feasibility through streamlined regulations and investor protection.This positions DIGIREAL ASSETS to democratize hotel investments,addressing the \$4.8 trillion global hotel sector's challenges with proven tokenization benefits like 20-50%liquidity enhancement and reduced entry barriers.

Introduction

Background on RWA Tokenization

The integration of blockchain with real-world assets(RWAs)is reshaping finance by tokenizing illiquid assets,improving accessibility,and enhancing efficiency.In 2025,the RWA sector has experienced explosive growth,with tokenized assets surging 260%to over \$23 billion from \$8.6 billion at the year's start,driven by institutional adoption and regulatory advancements.Tokenization offers benefits such as increased liquidity(up to 50% improvement),fractional ownership for broader access,and cost reductions in intermediaries by 20-30%,making it highly feasible for sectors like real estate and hospitality.In the hotel

industry, which represents a \$4.8 trillion market, tokenization can address vacancy rates of 15-20% by enabling dynamic inventory management and RevPAR optimization of 10-15% through AI-driven pricing.

Hong Kong's Regulatory Landscape

Hong Kong's strategic position as a global financial hub is bolstered by the LEAP framework and SFC's A-S-P-I-Re roadmap, which provide legal clarity, expand tokenized products, support advanced use cases, and offer policy incentives for RWA innovation. The Stablecoin Ordinance, effective August 1, 2025, further enhances feasibility by providing a secure environment for tokenized assets, with the market projected to expand to \$30 trillion by 2030.

Mission

DIGIREAL ASSETS is committed to tokenizing global hotel assets via blockchain technology, democratizing investments to allow anyone to participate in premium hotel ownership, operations, and revenue sharing. This fosters a transparent, secure, and sustainable ecosystem that delivers reliable wealth growth opportunities, backed by real-world data and regulatory compliance.

Vision

By 2030, DIGIREAL ASSETS envisions becoming the premier hotel RWA platform, managing over \$1 billion in tokenized assets across the Asia Pacific region. We aim to connect millions of users to high-quality properties, enable seamless cross-border investments, optimize yields through AI, and lead the industry's shift toward green and intelligent operations, with projected RevPAR improvements of 10-15%.

Company Culture

Our culture is built on four pillars to ensure long-term success and feasibility:

-Innovation & Transparency: We promote experimentation with blockchain and AI, with all asset data and decisions recorded on-chain for verifiable reliability.

-Inclusivity & Collaboration: A diverse team of Web3 experts and hospitality professionals collaborates via DAO, ensuring global perspectives and community-driven decisions.

-Sustainability & Responsibility: Prioritizing ESG-compliant hotels, we adhere to KYC/AML standards and promote green initiatives, aligning with trends where ESG assets grow 30%.

-Efficiency & User-Centric: Agile methodologies drive rapid iterations, with user feedback loops optimizing platform features for high retention rates (up to 40%).

Problem Statement

Challenges in Traditional Hotel Investments

The global hotel industry, valued at \$4.8 trillion, faces significant barriers: high capital requirements (often millions for full ownership), low liquidity (assets tied up for years), and operational inefficiencies like vacancy rates of 15-20% due to seasonal demand fluctuations. In Asia Pacific, despite a strong pipeline of 957,000 rooms, RevPAR in key markets like Taiwan and Seoul is driven by occupancy gains, but lags in recovery from pre-2019 levels by 1.6% in some submarkets. Cross-border investments are complicated by regulatory differences, and small investors are excluded, limiting market participation. Additionally, RWA tokenization penetration remains under 1%, despite the sector's 260% growth in 2025, indicating untapped potential but highlighting feasibility challenges like data verification and compliance.

Regulatory and Market Gaps

Regulatory fragmentation across jurisdictions increases risks, while the lack of standardized tokenization frameworks hinders scalability. In Hong Kong, prior to the LEAP framework, RWA adoption was constrained, but now with policy support, feasibility is high for compliant platforms.

Solution: DIGIREAL ASSETS Platform

Core Features and Benefits

DIGIREAL ASSETS addresses these challenges by tokenizing hotels into ERC-20 tokens or NFTs on the Base chain, using Chainlink oracles for real-time rental and value verification. This ensures data reliability and asset backing. Key features include:

-Fractional Ownership: Investors can buy shares as small as \$1, democratizing access and increasing liquidity by 20-50% through secondary markets.

-Yield Generation: Automated staking provides 6-10% APY from actual hotel revenues, with AI dynamic pricing optimizing RevPAR by 10-15%.

-DAO Governance:Token holders vote on asset management,ensuring transparency and community involvement,with retention rates boosted by 40%.

-Sustainability Integration:ESG scoring rewards green hotels,aligning with trends where tokenized renewable assets grow 30%.

-Invest-to-Stay Model:NFT-based perks allow investors to redeem tokenized shares for actual stays,creating a closed-loop ecosystem.

Benefits are highly feasible:Tokenization reduces intermediary costs by 20-30%,enhances efficiency,and is supported by Hong Kong's LEAP and SFC frameworks,making cross-border investments seamless.

Feasibility Analysis

With the RWA market at \$25 billion and growing at 72.8%CAGR,our platform's feasibility is underscored by low startup costs(<\$50,000 for MVP via Cyberport subsidies)and reliable tools like Chainlink for data integrity.Pilot tests in similar platforms show TVL growth of 380%in 2025.

Technology Overview

Blockchain Infrastructure

Built on the Base chain for low transaction fees(under \$0.01 per trade)and Ethereum compatibility,ensuring scalability for high-volume transactions.

Smart Contracts and Security

Utilizing OpenZeppelin libraries for audited contracts,with multi-signature wallets and role-based access.Security features include:

-KYCIAML integration via Onfido for compliance.

-Regular audits using tools like Slither and MythX.

Oracles and Data Integration

Chainlink oracles provide off-chain data feeds for rental income and property values, ensuring 99.9%uptime and tamper-proof reliability.

User Interface and Wallet Support

A user-friendly web/app interface with MetaMask and WalletConnect integration,supporting USDC for stable investments.

Business Model

Business Model Canvas(Table)

Component	Description	Feasibility	Details
-----------	-------------	-------------	---------

Key Partners	Hotels,Cyberport,SFC-compliant custodians,Chainlink.	Partnerships reduce costs by 20%;Cyberport provides subsidies.
--------------	--	--

Key Activities	Asset tokenization,yield distribution,DAO voting.	Automated via smart contracts,feasible with open-source tools.
----------------	---	--

Key Resources	Blockchain stack,regulatory licenses,AI models.	Low cost: OpenZeppelin free,LEAP framework accelerates licensing.
---------------	---	---

Value Propositions	Low-entry investment,6-10%APY,ESG rewards.	Backed by real data,RevPAR boost 10-15%.
--------------------	--	--

Customer Relationships	App dashboard,DAO forums,personalized reports.	Retention 40%via user-centric design.
------------------------	--	---------------------------------------

Channels	Website,X promotion,partners'sites.	Digital channels ROI high (30%growth).
----------	-------------------------------------	--

Customer Segments	Retail investors,hotel owners,institutions.	70%retail;Asia Pacific focus.
-------------------	---	-------------------------------

Cost Structure	Development 30%,compliance 20%,marketing 15%.	Total MVP<\$50K, scalable.
----------------	---	----------------------------

Revenue Streams	0.25-1%fees,2%staking,\$10/month subscriptions.	Projected \$100K/month post-MVP.
-----------------	---	----------------------------------

This model is reliable, with projected ROI of 6.5x based on 2025 RWA trends.

Tokenomics

Token Design

- Utility Token(DRA):Used for governance,staking,and fee discounts.
- Total Supply:1 billion tokens.
- Allocation:30%team (vested over 3 years),20%community airdrops,20%liquidity pools, 15%marketing,15%development.
- Mechanics:Fee burning(0.1%per transaction)for deflationary pressure;staking rewards distributed from revenue pool,ensuring sustainable APY.
- Economics Feasibility:Modeled after successful RWA tokens,with deflation supporting value growth amid market expansion to \$30T by 2030.

Roadmap

Phase 1:Q32025(Foundation)

- Apply for Cyberport incubation.
- Develop and launch MVP with initial tokenization of 1-2 hotels.

Phase 2:Q42025(Growth)

- Onboard 100 beta users,achieve \$10M TVL.
- Integrate basic AI for pricing.

Phase 3:2026(Expansion)

- Add multi-chain support,reach \$100M TVL.
- Launch ESG rewards and global partnerships.

Phase 4:2027-2030(Maturity)

-Scale to \$1B assets,full AI optimization,international compliance.

Team

-Founder:[Dean Deng]-Expertise in blockchain and hospitality,with 10+years in asset management.

-CTO:[Mathais-Web3 developer with experience in Solidity and DeFi protocols.

-Advisors {ZHANG}:Legal experts in SFC compliance,industry veterans from Asia Pacific hotels.

Risks and Compliance

Key Risks

-Market Volatility:Crypto fluctuations could impact token values;mitigated by stablecoin backing and revenue reserves.

-Regulatory Changes:Shifts in policies;addressed through ongoing SFC alignment and LEAP adherence.

-Technical Risks:Smart contract vulnerabilities;countered with audits and insurance.

-Operational Risks:Asset verification;ensured via Chainlink oracles.

Compliance Strategy

Fully aligned with SFC's A-S-P-I-Re and Stablecoin Ordinance,including KYC/AML and investor protection,ensuring high feasibility and low risk.

Conclusion

DIGIREAL ASSETS is poised to lead hotel RWA tokenization, leveraging a \$25 billion market and Hong Kong's supportive ecosystem for sustainable growth. With proven benefits like enhanced liquidity and reliable yields, we invite stakeholders to join this transformative journey.

DIGIREAL ASSETS 白皮书草案 (扩展版)

执行摘要

DIGIREAL ASSETS 是一家总部位于香港的区块链初创公司，致力于通过真实世界资产 (RWA) 代币化变革酒店行业。我们利用区块链技术，将酒店物业、房间库存和收入流碎片化为数字代币，实现从1美元起投的低门槛投资、基于真实租金收入的6-10%年化收益率 (APY)，以及去中心化自治组织 (DAO) 治理以增强社区参与和透明度。位于香港，我们充分利用于2025年6月26日推出的LEAP框架 (法律清晰度、代币化产品扩展、先进用例、政策支持)，该框架旨在为数字资产创建统一监管体制，并释放区域内240亿美元的RWA 代币化机会。我们的平台针对亚太酒店市场，该市场合同中管道达95.7万间房，年同比增长4.2%，RevPAR 预计2025年增长3.0%，主要由平均每日房价 (ADR) 驱动。全球RWA市场在2025年第二季度约达250亿美元，从年初86亿美元飙升260%，预计到2030年增长至30万亿美元，突显代币化桥接传统资产与区块链的巨大可行性和可靠性。我们的最小可行产品 (MVP) 将推出核心代币化功能，完全符合证券及期货事务监察委员会 (SFC) 于2025年2月19日发布的A-S-P-I-Re 路线图和数字资产政策2.0，确保通过简化监管和投资者保护实现高可行性。这使DIGIREAL ASSETS能够民主化酒店投资，通过代币化益处如20-50%流动性提升和降低进入门槛，解决4.8万亿美元全球酒店行业的挑战。

引言

RWA代币化背景

区块链与真实世界资产 (RWA) 的融合正在重塑金融，通过代币化非流动性资产，提高可及性和效率。2025年，RWA 领域经历了爆炸性增长，代币化资产从年初86亿美元飙升260%至超过230亿美元，由机构采用和监管进步驱动。代币化提供益处如流动性提升50%、碎片化所有权以扩大访问，以及中介成本降低20-30%，使其在房地产和酒店等领域高度可行。在价值

4. 8万亿美元的行业，代币化可通过动态库存管理和AI驱动定价解决15-20%的空置率问题，实现RevPAR优化10-15%。

香港监管景观

香港作为全球金融中心的战略地位得益于LEAP 框架和SFC 的A-S-P-I-Re路线图，提供法律清晰度、扩展代币化产品、支持先进用例并提供政策激励以推动RWA创新。稳定币条例于2025年8月1日生效，进一步提升可行性，为代币化资产提供安全环境，市场预计到2030年扩展至30万亿美元。

使命

DIGIREAL ASSETS致力于通过区块链技术代币化全球酒店资产，实现投资民主化，让任何人参与高端酒店所有权、运营和收入分享。这培养了一个透明、安全和可持续的生态，提供可靠的财富增长机会，由真实世界数据和监管合规支持。

远景

到2030年，DIGIREAL ASSETS设想成为首要酒店RWA平台，管理亚太地区超过10亿美元的代币化资产。我们旨在连接数百万用户与高质量物业，实现无缝跨境投资，通过AI优化收益，并引领行业向绿色智能运营转型，预计RevPAR 改善10-15%。

公司文化

我们的文化基于四个支柱，确保长期成功和可行性：

-创新与透明：促进区块链和AI实验，所有资产数据和决策链上记录以确保可验证可靠性。

-包容与协作：Web3专家和酒店专业人士的多元团队，通过DAO协作，确保全球视角和社区驱动决策。

-可持续与责任：优先ESG 合规酒店，遵守KYCIAML 标准，推动绿色倡议，与2025年ESG 资产增长30%的趋势一致。

-高效与用户导向**：敏捷方法驱动快速迭代，用户反馈循环优化平台功能，实现高达40%的保留率。

问题陈述

传统酒店投资挑战

全球酒店行业价值4.8万亿美元，面临重大障碍：高资本要求（全所有权往往需数百万）、低流动性（资产锁定数年），以及季节需求波动导致15-20%的空置率等运营低效。在亚太地区，尽管管道达95.7万间房，但台湾和首尔等关键市场的RevPAR 由入住率增长驱动，在某些子市场落后2019水平1.6%。跨境投资因监管差异复杂，小投资者被排除，限制市场参与。此外，RWA 代币化渗透率不足1%，尽管2025年行业增长260%，但突显数据验证和合规等可行性挑战。

监管和市场差距

司法管辖区的监管碎片化增加风险，而标准化代币化框架的缺乏阻碍可扩展性。在香港，LEAP 框架之前RWA 采用受限，但现在政策支持下，合规平台的可行性高。

解决方案：DIGIREAL ASSETS平台

核心功能和益处

DIGIREAL ASSETS通过在Base 链上将酒店代币化为ERC-20 代币或NFT，使用Chainlink预言机实时验证租金和价值，解决这些挑战。这确保数据可靠性和资产支持。关键功能包括：

- 碎片化所有权：投资者可购买小至1美元的份额，通过二级市场民主化访问并提升流动性20-50%。

- 收益生成：自动化staking从实际酒店收入提供6-10%APY, AI 动态定价优化RevPAR 10-15%。

- DAO 治理：代币持有者投票资产管理，确保透明度和社区参与，提升保留率40%。

- 可持续整合：ESG 评分奖励绿色酒店，与2025年代币化可再生资产增长30%的趋势一致。

- 投资即住宿模式**：基于NFT 的特权允许投资者兑换代币化份额为实际住宿，创建闭环生态。

益处高度可行：代币化降低中介成本20-30%，提升效率，并由香港LEAP 和SFC 框架支持，使跨境投资无缝。

可行性分析

RWA 市场达250亿美元，CAGR 72.8%增长，我们平台的可行性由低启动成本(通过Cyberport补贴MVP<5 万美元)和Chainlink等可靠工具突出。类似平台试点显示2025年TVL增长380%。

技术概述

区块链基础设施

基于Base 链构建，低交易费(每笔<0.01美元)和以太坊兼容，确保高容量交易的可扩展性。

智能合约和安全

利用OpenZeppelin库进行审计合约，多签名钱包和角色访问。安全功能包括：

- 通过Onfido集成KYCIAML以合规。
- 使用Slither和MythX工具定期审计。

预言机和数据集成

Chainlink 预言机提供链下数据馈送，用于租金收入和物业价值，确保99.9%正常运行时间和防篡改可靠性。

用户界面和钱包支持

用户友好的web/app界面，支持MetaMask和WalletConnect集成，使用USDC进行稳定投资。

商业模式

商业模式画布（表格）

组件 | 描述 | 可行性细节 |

—

关键伙伴 | 酒店、Cyberport、SFC 合规托管、Chainlink。 | 伙伴关系降低成本20%；Cyberport提供补贴。

关键活动|资产代币化、收益分配、DAO投票。|通过智能合约自动化，使用开源工具可行。|

|关键资源|区块链栈、监管许可、AI模型。|低成本：OpenZeppelin 免费，LEAP框架加速许可。|

|价值主张|低门槛投资、6-10% APY、ESG 奖励。|由真实数据支持，RevPAR 提升10-15%。|

|客户关系|App仪表盘、DAO论坛、个性化报告。|通过用户导向设计保留率40%。|

|渠道|网站、X 推广、伙伴站点。|数字渠道ROI 高(增长30%)。|

|客户细分|零售投资者、酒店业主、机构。|70%零售；亚太焦点。|

|成本结构|开发30%、合规20%、营销15%。|MVP 总计<5万美元，可扩展。|

|收入来源|0.25-1%费用、2%staking、月10美元订阅。|MVP后预计月收入10万美元。|

此模式可靠，基于2025年RWA 趋势预计ROI 6.5x。

通证经济学

通证设计

-实用通证 (DRA)**： 用于治理、staking和费用折扣。

-总供应：10亿通证。

-分配：30%团队(3年锁仓)、20%社区空投、20%流动性池、15%营销、15%开发。

-机制：每笔交易0.1%费用燃烧以通缩；staking奖励从收入池分配，确保可持续APY。

-经济学可行性**：仿效成功RWA 通证建模，随着市场到2030年30万亿美元扩展支持价值增长。

路线图

第一阶段：2025年第三季度(基础)

-申请Cyberport孵化。

- 开发并推出MVP， 初始代币化1-2酒店。

第二阶段：2025年第四季度（增长）

- 上线100 Beta用户，实现1000万美元TVL。

- 集成基本AI定价。

第三阶段：2026年（扩展）

- 添加多链支持，达到1亿美元TVL。

- 推出ESG 奖励和全球伙伴。

第四阶段：2027-2030年（成熟）

- 扩展至10亿美元资产，全AI优化，国际合规。

团队

- 创始人：[Dean]**-区块链和酒店专家，10年以上资产管理经验。

- CTO： [MATHAIS]**-经验丰富的Web3 开发者，精通Solidity和DeFi协议。

- 顾问： SFC合规法律专家，亚太酒店行业资深人士。

风险与合规

关键风险

- 市场波动：加密波动可能影响通证价值；通过稳定币支持和收入储备缓解。

- 监管变化：政策转变；通过持续SFC 对齐和LEAP遵守处理。

- 技术风险：智能合约漏洞；通过审计和保险对抗。

- 运营风险：资产验证；通过Chainlink 预言机确保。

合规策略

完全符合SFC的A-S-P-I-Re和稳定币条例，包括KYCIAML和投资者保护，确保高可行性和低风险。

结论

DIGIREAL ASSETS处于领导酒店RWA代币化的前列，利用250亿美元市场和香港支持性生态实现可持续增长。通过提升流动性和可靠收益等证明益处，我们邀请利益相关者加入这一变革之旅。
